WHY I WANT FOR {{COMPANY}}

I want to work for {{Company}} because it would enable me to be more dedicated and focused on my career. I believe that working for a company that has such an excellent reputation will allow me to learn from the best and have an opportunity to contribute in an environment where I can thrive.

HOW I CAN ADD VALUE

I have experience leading teams and creating processes that help people get their jobs done efficiently and effectively. I have helped many of my previous bosses/clients get promotions. I helped them achieve their goals and meet the requirements for promotion by assisting them to achieve their personal, career, financial, and life goals. When I'm hired, I can help design new and existing processes with an eye on improving efficiency, productivity, and revenue. I can help build a team culture that supports practical work. In one of my past roles, I helped the company design new techniques for hiring and onboarding new employees and improving existing ones to speed up our development process.

PLACES I'VE WORKED

US BIOTEK LABORATORIES Shoreline, WA
1/2021-7/2022

Director

- Hired to direct and architect B2C websites in full collaboration with CEO, CFO, and Marketing team.
